Water Shut Off Request

Address of Repair: _____ **Unit#**: _____

Specific Location of Repair: _____

Please describe the specific reason for the Request:

_____

_____

_____

Because of the age of Mission Ridge plumbing, during any residential plumbing repair, the resident is required to have all shut-off valves (angle stops) in the unit inspected. Installation and/or replacement of angle stops is to be carried out at that time at the owner's expense. The Associations representative will be required to inspect that such repairs have been completed before water is restored and the resident's plumber is released. There is a $50 fee that must be paid in advance at the onsite office.
